                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      . J. Immunol. 25:926-930(1995).
FUNCTION: RECEPTOR FOR THE OX40L/GP34 CYTOKINE.
SUBCELLULAR LOCATION: Type I membrane protein.
SIMILARITY: CONTAINS 4 THER-CYS REPEATS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                               NOACKPWTNCTL

Biophys. Res. Commun. 253:395-400(1998).

- PROCTION: RECEPTOR FOR RANK LIGAND (RANKL; ALSO KNOWN AS OSTEOCLAST DIFFERENTIATION FACTOR OR ODF), ESSENTIAL FOR RANKL-MEDIATED OSTEOCLASTOGENESIS. INVOLVED IN THE REGULATION OF INTERACTIONS BETWEEN T-CELLS AND DENDRITIC CELLS.

- SUBCELLULAR LOCATION: Type I membrane protein (Potential).

- TISSUE SPECIFICITY: UBIQUITOUS EXPRESSION WITH HIGH LEVELS IN TRABECULAR BONE, THYMUS, SMALL INTESTINE, LUNG, BRAIN AND KIDNEY.

WEAKLY EXPRESSED IN SPLEEN AND BONE MARROW.

-I- CATALYTIC ACTIVITY: Alpha, alpha-trehalose + H(2)O = 2 D-
-I- SUBUNIT: HOMODIMER; DISULFIDE-LINKED.
-I- SUBCELLULAR LOCATION: Attached to the membrane by a GPI-
-I- TISSUE SPECIFICITY: SMALL INTESTINE, KIDNEY, AND LESSER
-I- SIMILARITY: BELONGS TO FAMILY 37 OF GLYCOSYL HYDROLASES.

"Leukocystatin, a new class II cystatin caprocelle cells.";

hematopoietic cells.";

J. Biol. Chem. 273:16400-16408(1998).

-i- FUNCTION: INHIBITS PAPAIN AND CAPHEPSIN L BUT WITH AFEINITIES LOWER THAN OTHER CYSTATINS. MAY PLAY A ROLE IN IMMUNE REGULATION THROUGH INHIBITION OF A UNIQUE TARGET IN THE HEMATOPOIETIC SYSTEM.

-i- SUBCELULAR LOCATION: Secreted (Probable).

-i- SUBCELULAR LOCATION: Secreted (Probable).

-i- SIMILARITY: BELONGS TO THE CYSTATIN FAMILY.

-i- SIMILARITY: BELONGS TO THE CYSTATIN FAMILY.

SUBMITTED (DEC-1997) TO THE EMBLYGEBBANK/DDBJ databases
-I- FUNCTION; ACTS AS A POTENT ANTIMICROBIAL PEPTIDE.
-I- TISSUE SPECIFICITY: EXPRESSED IN TESTIS, SPLEEN, STO.
INTESTINE: VERY LOW EXPRESSION FOUND IN HEART, LUNG
MUSCLE, NO EXPRESSION IN BRAIN, KIDNEY OR LIVER.
-I- SIMILARITY: BELONGS TO THE CATHELICIDIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                SEQUENCE FROM N.A.
